Edexcel

## Mark Scheme (Results)

November 2020

Pearson Edexcel GCSE (9 – 1)  
In Mathematics (1MA1)  
Higher (Non-Calculator) Paper 1H

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at [www.edexcel.com](http://www.edexcel.com) or [www.btec.co.uk](http://www.btec.co.uk). Alternatively, you can get in touch with us using the details on our contact us page at [www.edexcel.com/contactus](http://www.edexcel.com/contactus).

## **Pearson: helping people progress, everywhere**

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: [www.pearson.com/uk](http://www.pearson.com/uk)

## General marking guidance

These notes offer general guidance, but the specific notes for examiners appertaining to individual questions take precedence.

- 1** All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded; exemplification/indicative content will not be exhaustive. When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the response should be sent to review.

- 2** All the marks on the mark scheme are designed to be awarded; mark schemes should be applied positively. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme. If there is a wrong answer (or no answer) indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

**Questions where working is not required:** In general, the correct answer should be given full marks.

**Questions that specifically require working:** In general, candidates who do not show working on this type of question will get no marks – full details will be given in the mark scheme for each individual question.

- 3** **Crossed out work**

This should be marked **unless** the candidate has replaced it with an alternative response.

- 4** **Choice of method**

If there is a choice of methods shown, mark the method that leads to the answer given on the answer line. If no answer appears on the answer line, mark both methods **then award the lower number of marks.**

- 5** **Incorrect method**

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review for your Team Leader to check.

- 6** **Follow through marks**

Follow through marks which involve a single stage calculation can be awarded without working as you can check the answer, but if ambiguous do not award.

Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

**7 Ignoring subsequent work**

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question or its context. (eg. an incorrectly cancelled fraction when the unsimplified fraction would gain full marks).

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect (eg incorrect algebraic simplification).

**8 Probability**

Probability answers must be given as a fraction, percentage or decimal. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths).

Incorrect notation should lose the accuracy marks, but be awarded any implied method marks.

If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

**9 Linear equations**

Unless indicated otherwise in the mark scheme, full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously identified in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded (embedded answers).

**10 Range of answers**

Unless otherwise stated, when an answer is given as a range (eg 3.5 – 4.2) then this is inclusive of the end points (eg 3.5, 4.2) and all numbers within the range.

**11 Number in brackets after a calculation**

Where there is a number in brackets after a calculation eg  $2 \times 6 (=12)$  then the mark can be awarded **either** for the correct method, implied by the calculation **or** for the correct answer to the calculation.

**12 Use of inverted commas**

Some numbers in the mark scheme will appear inside inverted commas eg “12”  $\times$  50 ; the number in inverted commas cannot be any number – it must come from a correct method or process but the candidate may make an arithmetic error in their working.

**13 Word in square brackets**

Where a word is used in square brackets eg [area]  $\times$  1.5 : the value used for [area] does **not** have to come from a correct method or process but is the value that the candidate believes is the area. If there are any constraints on the value that can be used, details will be given in the mark scheme.

**14 Misread**

If a candidate misreads a number from the question. eg uses 252 instead of 255; method or process marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review.

### **Guidance on the use of abbreviations within this mark scheme**

- M** method mark awarded for a correct method or partial method
- P** process mark awarded for a correct process as part of a problem solving question
- A** accuracy mark (awarded after a correct method or process; if no method or process is seen then full marks for the question are implied but see individual mark schemes for more details)
- C** communication mark awarded for a fully correct statement(s) with no contradiction or ambiguity
- B** unconditional accuracy mark (no method needed)
- oe** or equivalent
- cao** correct answer only
- ft** follow through (when appropriate as per mark scheme)
- sc** special case
- dep** dependent (on a previous mark)
- indep** independent
- awrt** answer which rounds to
- isw** ignore subsequent working

| Question       | Answer          | Mark | Mark scheme   | Additional guidance   |
| 23             | $\frac{27}{56}$ | P1   | <p>for <math>\frac{3}{8}</math> <b>and</b> <math>\frac{7}{9}</math></p> <p><b>OR</b></p> <p>uses a total of 72 cards and shows a process to find the number of cards with a black shape <b>or</b> the number of cards with a triangle,</p> <p>eg <math>72 \div 8 \times 3 (=27)</math> <b>or</b> <math>72 \div 9 \times 7 (=56)</math></p>  | 72 or any multiple of 72  |
|                |                 | P1   | <p>for process shown to divide fractions <math>\frac{3}{8} \div \frac{7}{9}</math> <b>or</b> <math>\frac{3}{8} \times \frac{9}{7}</math></p> <p><b>OR</b> for <math>\frac{3}{8} \times \frac{9}{9} (= \frac{27}{72})</math> <b>and</b> <math>\frac{7}{9} \times \frac{8}{8} (= \frac{56}{72})</math></p> <p><b>OR</b></p> <p>uses a total of 72 cards and shows a process to find the number of cards with a black shape <b>and</b> the number of cards with a triangle,</p> <p>eg <math>72 \div 8 \times 3 (=27)</math> <b>and</b> <math>72 \div 9 \times 7 (=56)</math></p> | <p>Could be seen in a ratio,<br/>eg 27 : 45 or 16 : 56</p> <p>Accept the division shown as <math>\frac{\frac{3}{8}}{\frac{7}{9}}</math></p> |
|                |                 | A1   | <p>for <math>\frac{27}{56}</math> or any other equivalent fraction</p>  | <p>Could be seen in ratios,<br/>eg 27 : 45 and 16 : 56</p> <p>Answer of 27 : 56 gets P2A0</p>   |

## Modifications to the mark scheme for Modified Large Print (MLP) papers: 1MA1 1H

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.

The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:

Angles:  $\pm 5^\circ$

Measurements of length:  $\pm 5$  mm

---

| PAPER: 1MA1/1H |   |                      |
|----------------|---|----------------------|
| Question       | Modification  | Mark scheme notes    |
| 3              | Wording added “Look at the diagram for Question 3 in the Diagram Book.”<br>The wording “The diagram shows four graphs” removed and replaced by “It shows four graphs labelled graph A, graph B, graph C and graph D.” Diagrams enlarged.<br>Graph lines made thicker. Open headed arrows. Headings moved above the graph.   | Standard mark scheme |
| 4              | Wording added “Look at the diagram for Question 4 in the Diagram Book.”<br>The wording “The diagram shows four triangles” removed and replaced by “It shows four triangles.” Diagram enlarged. Headings moved above the diagrams.<br>Angles moved outside of the angle arcs and the angle arcs made smaller.<br>Triangles straightened up so a 10 cm side lies horizontally.<br>Braille only: Description added of the triangles. | Standard mark scheme |
| 6              | The wording “ADC is a triangle” removed. Diagram enlarged.<br>Wording added “Look at the diagram for Question 6 in the Diagram Book. It shows the triangle ADC.” Angles moved outside of the angles arcs and the angle arcs made smaller.   | Standard mark scheme |

| PAPER: 1MA1/1H |  |   |
|----------------|--|---|
| Question       | Modification   | Mark scheme notes   |
| 7              | <p>Wording added “Look at the table and the diagram for Question 7 in the Diagram Book.”</p> <p>Wording “This stem and leaf diagram shows...” removed and replaced with “The stem and leaf diagram shows...”</p> <p>The wording “...of a group of Year 9 girls” removed and replaced by “...of a group of girls in Year 9”.</p> <p>The wording “...of a group of 15 Year 9 boys” removed and replaced by “...of a group of 15 boys in Year 9”.</p> <p>Table enlarged and kept on the same page as the stem and leaf diagram.</p> <p>Diagram enlarged and a tracking line added. Key moved above the diagram.</p> | Standard mark scheme  |
| 8              | <p>Model provided for all candidates with a base added to represent the horizontal floor.</p> <p>Wording added “Look at the diagram for Question 8 in the Diagram Book. You may be provided with a model.”</p> <p>The wording “The diagram shows a prism...” removed and replaced by “The diagram and the model show a prism...”.</p> <p>Diagram enlarged. Dashed lines to be made thicker and longer.</p> <p>The pressure formula to be kept in the Question Paper and moved to the left of the diagram in the Diagram Book.</p>  | Standard mark scheme  |
| 9              | <p>The wording “Write these numbers in order of size” removed and replaced by “Write these four numbers in order of size.”</p>   | Standard mark scheme  |
| 10             | <p>The letter <math>a</math> changed to <math>w</math>. The letter <math>b</math> changed to <math>x</math>. The letter <math>c</math> changed to <math>y</math>.</p>  | Standard mark scheme except for the letter changes indicated. |

| PAPER: IMA1/1H   |   |   |  |   |   |   |   |  |  |
|--|---|---|--|---|---|---|---|--|--|
| Question   |   | Modification  | Mark scheme notes  |   |   |   |   |  |  |
| 12   | (a)   | The value of the 350-400 interval changed from '20' to '25'.<br>The value of the 450-500 interval changed from '10' to '5'.<br>Wording added "Look at the table for Question 12(a) in the Diagram Book." Table enlarged.<br>The wording "The table gives information..." removed and replaced by "It gives information..."      | Standard mark scheme   |   |   |   |   |  |  |
|  | (b)   | Wording added "Look at the diagram for Question 12(b) in the Diagram Book."<br>The wording "On the grid opposite..." removed and replaced by "On the grid..."<br>Diagram enlarged. Right axis labelled. Small squares removed.<br>The axes labels moved to the top of the vertical axis and to the left of the horizontal axis. | Standard mark scheme   |   |   |   |   |  |  |
|  | (c)   | The wording "60% of this group of people have a weekly wage of £360 or less" removed and replaced by "75% of this group of people have a weekly wage of £375 or less" to make the question accessible.  | <table border="1"> <tr> <td>M1 for <math>75 \div 100 \times 80 (=60)</math> oe</td> <td>M1 reading value from graph at wage = 375 (=48)</td> </tr> <tr> <td>M1 reading value from graph at cf = 60 (=400)</td> <td>M1 for "48" <math>\div 80 \times 100 (=60(\%))</math><br/><b>or</b> for <math>75 \div 100 \times 80 (=60)</math></td> </tr> <tr> <td colspan="2">Standard mark scheme (NO) with 60 and "400" <b>or</b> with "48" and 60(%) <b>or</b> with "48" and 60</td> </tr> </table> | M1 for $75 \div 100 \times 80 (=60)$ oe | M1 reading value from graph at wage = 375 (=48) | M1 reading value from graph at cf = 60 (=400) | M1 for "48" $\div 80 \times 100 (=60(\%))$<br><b>or</b> for $75 \div 100 \times 80 (=60)$ | Standard mark scheme (NO) with 60 and "400" <b>or</b> with "48" and 60(%) <b>or</b> with "48" and 60 |  |
| M1 for $75 \div 100 \times 80 (=60)$ oe  | M1 reading value from graph at wage = 375 (=48)   |   |  |   |   |   |   |  |  |
| M1 reading value from graph at cf = 60 (=400)  | M1 for "48" $\div 80 \times 100 (=60(\%))$<br><b>or</b> for $75 \div 100 \times 80 (=60)$ |   |  |   |   |   |   |  |  |
| Standard mark scheme (NO) with 60 and "400" <b>or</b> with "48" and 60(%) <b>or</b> with "48" and 60 |   |   |  |   |   |   |   |  |  |
| 17   |   | The letter <i>f</i> changed to <i>p</i> , <i>d</i> changed to <i>m</i> .  | Standard mark scheme but note the changes to the letters.  |   |   |   |   |  |  |
| 21   |   | The wording "DEF is a triangle" replaced by "Look at the diagram for Question 21 in the Diagram Book. It shows the triangle DEF." Diagram enlarged.   | Standard mark scheme   |   |   |   |   |  |  |
