Read **Item B** below and answer the question that follows.

**Item B**

The increased interconnections across the globalised world have created new opportunities for crime and also new types of crime. For example, the rise of new technology has led to the development of cybercrime. Marxists argue that reduced control over finance and corporations has led to increased insecurities, inequalities and crime.

However, others have argued that globalisation has enabled more effective ways of tackling crime. For example, states may cooperate in tackling international crimes such as green crimes and human rights abuses.

Applying material from **Item B** and your knowledge, evaluate the view that globalisation has led to increased levels of crime.

Read **Item C** below and answer the question that follows.

**Item C**

Feminists argue that society continues to be patriarchal. Radical feminists argue that patriarchy is the most important organising principle in society and strongly disadvantages women. Examples of this include the gender pay gap in employment as well as the inequalities and oppression experienced in the private world of the family.

However, Marxists would argue that many feminists ignore the influence of capitalism as an organising principle in determining inequalities and oppression in today's society.

Applying material from **Item C** and your knowledge, evaluate the extent to which today's society can be seen as patriarchal.
