## **Economics**

Paper 2

# [G9282] FRIDAY 10 JUNE, AFTERNOON

#### TIME

1 hour 15 minutes.

#### **INSTRUCTIONS TO CANDIDATES**

Write your Centre Number and Candidate Number in the spaces provided at the top of this page.

You should answer both questions in the spaces provided. If you do not have enough space to complete your answer, extra lined pages are provided at the back of the booklet.

#### INFORMATION FOR CANDIDATES

The total mark for this paper is 60.

Any working should be clearly shown since marks may be awarded for partially correct solutions.

Your quality of written communication will be taken into account in assessing your answers to 1(c), 1(d)(ii), 1(e), 2(d) and 2(f).

#### **ADVICE FOR CANDIDATES**

You should take into account the maximum marks available when deciding how much time to spend on each question or part question.

1 Study the information below and answer the questions that follow.

#### The contribution of the financial services industry to the UK economy

The UK has a large financial services industry that makes an important contribution to the UK's economy. The industry is made up of financial institutions such as banks, building societies and insurance companies that sell financial services to customers. Demand for these services comes from businesses and individuals, both within the UK and from other countries. Hence, the financial services industry also contributes to the UK's international trade.

In 2018, the UK's financial services industry was responsible for:

- Creating over 1 million jobs, 3% of the UK's total employment
- Contributing £129 billion in output to the economy, approximately 10% of the total output
- Earning more from exporting financial services to the European Union (EU) than was paid for importing financial services the trade surplus was £16 billion
- Paying £29 billion in taxation to the UK government.

**Table 1** below shows how the financial services industry contributes to the local economies in selected regions of the UK, including Northern Ireland.

Table 1: The contribution of the financial services industry to selected regions in the UK

|                  | Total value to the region's economy (£ billions) | Share of the region's total output (%) | Region's share of<br>the UK's industry<br>(%) |
|------------------|--|--|---|
| London           | 63.8   | 15%                                    | 49%   |
| Scotland         | 9.2  | 7%                                     | 7%  |
| Wales            | 2.8  | 5%                                     | 2%  |
| Northern Ireland | 1.7  | 4%                                     | 1%  |

In 2018, the UK's "Big Four" banks, Lloyds, Barclays, HSBC and RBS, announced record profits of £24 billion, the highest in the ten years since the financial crisis of 2008. This was a £12 billion increase on the previous year.

The Financial Conduct Authority (FCA), the industry's regulator, has investigated the way banks have sold some financial products and ruled that they should compensate consumers who were disadvantaged. Lloyds alone has set aside £750 million for such payments.

In spite of the added cost of paying compensation to many consumers, in recent years banks have still made large profits. Their situation has been helped by better economic conditions – high levels of employment, low inflation and increased average wages. Family finances have generally been healthy with people more confident about borrowing money and fewer defaulting on loans.

|   | In 2020, the Chancellor of the Exchequer announced large increases in public spending for areas such as schools, the police and the health service. However, increased government spending will need to be funded through increased taxation or borrowing.  Critics point to the slowdown of major economies throughout the world, such as China, and the economic uncertainty surrounding the UK's departure from the European Union, that will make future government financial planning very difficult.  Discuss the effectiveness of two fiscal policy measures that the povernment could use to promote economic growth. | In 2020, the Chancellor of the Exchequer announced large increases in public spending for areas such as schools, the police and the health service.
