General marking principles for Higher Business Management

Always apply these general principles. Use them in conjunction with the detailed marking instructions, which identify the key features required in candidates' responses.

- (a) Always use positive marking. This means candidates accumulate marks for the demonstration of relevant skills, knowledge and understanding; marks are not deducted for errors or omissions.
- (b) If a candidate response does not seem to be covered by either the principles or detailed marking instructions, and you are uncertain how to assess it, you must seek guidance from your team leader.
- (c) For **describe** questions, candidates must make a number of relevant, factual points up to the total mark allocation for the question. These should be key points; they do not need to be in any particular order. Candidates may provide a number of straightforward points or a smaller number of developed points, or a combination of these.

Up to the total mark allocation for this question:

- award **1 mark** for each accurate relevant point of knowledge
- award a second mark for any point that is developed from the point of knowledge.

- (d) For **explain** questions, candidates must make a number of points that relate cause and effect and/or make the relationships between things clear, for example by showing connections between a process/situation. These should be key reasons and may include theoretical concepts. There is no need to prioritise the reasons. Candidates may provide a number of straightforward reasons or a smaller number of developed reasons, or a combination of these.

Up to the total mark allocation for this question:

- award **1 mark** for each accurate relevant point of reason
- award a second mark for any other point that is developed from the same reason.

For each relevant point of reason candidates must give a point of identification and a point of explanation to gain a mark. This is exemplified in the marking instructions, a dash (–) is used to show the two parts of the response.

- (e) For **compare** questions, candidates must demonstrate knowledge and understanding of similarities and/or differences between things, methods or choices. The relevant comparison points could include theoretical concepts.

Up to the total mark allocation for this question:

- award **1 mark** for each accurate point of comparison.

- (f) For **discuss** questions, candidates must make a number of points that communicate issues, ideas, or information about a given topic or context that will make a case for and/or against. They do not always need to give both sides of the debate in their response.

Up to the total mark allocation for this question:

- award **1 mark** for any accurate point of knowledge that is clearly relevant
- award a second mark for any point that is developed from the point of knowledge.

Where a mark is available for the development of a response this is exemplified in the marking instructions, a hollow bullet point is used to show the developed response.
